The Platform for MSP Security

The EDA0 Control Hub is a unified platform designed for MSPs and IT service providers, providing a centralized, multi-tenant environment to manage all clients' security from a **single pane of glass**.

Multi-Tenant Dashboard

Manage all clients efficiently from one unified dashboard

Threat Protection Suite

Identity, email, endpoint, cloud, dark web, MDR & phishing

Vulnerability & Exposure Management

Continuous scanning and risk prioritization

Network & Asset Management

Full visibility across all connected assets

Automated Client Reporting

Streamlined, white-label ready reports for clients

White-Label Services

New revenue streams under your own brand

Intelligent Assistant for Query Handling and Case Management

Automate query resolution and security case management in one place.

Why MSPs Choose EDAO

Consolidate Tools

Replace multiple point solutions with one unified platform

Automate Operations

Automated monitoring, alerting, and reporting at scale

Deliver Enterprise Security

Offer enterprise-grade cybersecurity services to every client

Create Revenue Streams

Launch white-label security services under your brand

Manage at Scale

Manage multiple clients efficiently from one dashboard

High-Level Security Services

Vulnerability & Threat Management

Email Security

Web & Cloud Security

Identity & Access Management

Identity Exposure & Dark Web

Endpoint Protection (+ MDR 24x7)

Beyond EDR (OT/IoT)

Phishing Simulation & Awareness

Penetration Testing

SOC-as-a-Service

EDAO unifies cybersecurity into a single platform - combining services and solutions to help MSPs and organizations **protect, manage, and scale with confidence.**
