## Who We Are

### A Unified Cybersecurity Platform

EDAO provides a unified platform, services, and solutions that enable MSPs and organizations to deliver and manage enterprise-grade cybersecurity.

## Who We Help

### Built for These Organizations

- Managed Service Providers (MSPs)
- Compliance-driven organizations
- Modern organizations across IT and OT environments

## What We Do

### Protection Across Every Layer

- Centralized visibility
- Continuous protection
- Scalable cybersecurity delivery

EDAO Control Hub

# The Platform for MSP Security

The EDAO Control Hub is a unified platform designed for MSPs and IT service providers — providing a centralized, multi-tenant environment to manage all clients' security from a **single pane of glass**.

The screenshot shows the EDAO Control Hub interface. At the top, there's a navigation bar with 'Global', 'MSP', 'Customer', 'Performance', 'Devices', 'Proxies', 'Alerts', 'Inventory', 'Findings', 'Solutions', 'Tenants', 'Users', and 'Subscriptions'. Below this is the 'Global Dashboard' with several key metrics: 5 active partners (MSPs), 8 across all MSPs (Customers), 10 across all customers (Sites), 14 click to view (Devices), 0 up · 0 down · click to view (EDAO-NMS Proxies), 0 click to view (Active Alerts), and 0 click to view (Critical Alerts). A central clock shows the date 2026-04-18 and time 09:36. Below the clock is a 'TOP TRIGGERS' table with columns for Host, Trigger, Severity, and # Problems. The table lists several desktop triggers related to Windows services and disk space. To the right is a 'SITES MAP' showing a world map with colored markers for different regions. At the bottom right is a 'CONTROL SERVER SYSTEM HEALTH' section with indicators for NMS Server Status (Online), Network Health (98.2%), EDAO-NMS Proxies Online / Offline, and Devices Online / Offline.

### Multi-Tenant Dashboard

Manage all clients efficiently from one unified dashboard

### Threat Protection Suite

Identity, email, endpoint, cloud, dark web, MDR & phishing

### Vulnerability & Exposure Management

Continuous scanning and risk prioritization

### Network & Asset Management

Full visibility across all connected assets

### Automated Client Reporting

Streamlined, white-label ready reports for clients

### White-Label Services

New revenue streams under your own brand

#### MSP Value

### Why MSPs Choose EDAO

- **Consolidate Tools**  
Replace multiple point solutions with one unified platform
- **Automate Operations**  
Automated monitoring, alerting, and reporting at scale
- **Deliver Enterprise Security**  
Offer enterprise-grade cybersecurity services to every client
- **Create Revenue Streams**  
Launch white-label security services under your brand
- **Manage at Scale**  
Manage multiple clients efficiently from one dashboard

#### Who We Serve

### Client Segments We Support

#### MSPs

Unified platform to manage and deliver security at scale

#### Compliance-driven Organizations

Audit-ready frameworks and continuous monitoring

#### Enterprise

Enterprise-grade protection across all layers

#### OT / IoT Environments

Specialized security for operational technology

#### Full-Spectrum Services

### High-Level Security Service Areas

**Vulnerability & Threat Management**

**Email Security**

**Web & Cloud Security**

**Identity & Access Management**

**Identity Exposure & Dark Web**

**Endpoint Protection (EDR/MDR 24x7)**

**Beyond EDR (OT/IoT)**

**Phishing Simulation & Awareness**

**Penetration Testing**

**SOC-as-a-Service**

EDAO unifies cybersecurity into a single platform - combining services and solutions to help MSPs and organizations **protect, manage, and scale with confidence.**
