- Advanced Malware /URL Protection
- Mailbox-Level Anomaly Detection
- AI-Powered Incident Response
- Decentralized Real-Time Threat Detection
- Virtual SOC Analyst
- Phishing Simulation & Security Awareness Training

Why Email Security Matters

Email is the #1 attack vector for cybercriminals. The scale and cost of email-based threats has never been greater — making proactive protection essential for every organization.

3.4B

Phishing emails sent daily worldwide — email remains the #1 attack vector for cyber threats.

\$4.8M

Average cost of a successful phishing breach, taking an average of 254 days to detect and contain.

86%

Reduction in phishing susceptibility within one year when organizations implement security awareness training.

Threats We Protect Against

EDAO-Guard defends your organization against the full spectrum of modern email-based attacks — from opportunistic phishing to sophisticated, targeted campaigns.

Phishing & Spear Phishing

Targeted deception attacks designed to steal credentials or trick users into dangerous actions.

Business Email Compromise

Impersonation of executives or vendors to authorize fraudulent wire transfers or data disclosure.

Malware & Ransomware

Malicious attachments and links that deploy ransomware, spyware, or data-exfiltration tools.

Social Engineering

Psychologically manipulative emails that exploit trust, urgency, or authority to bypass human judgment.

Why Organizations Choose EDAO

Rapid time-to-value

- Fast to deploy, simple to manage and highly effective in stopping all types of email threats.
